Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 1/13/05.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-39, are rejected under the judicially created doctrine of double patenting over claims 1-19 of U. S. Patent No. 6,678,531 B1 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a method of controlling base station transmission power in a telecommunication system comprising mobile station and base stations wherein a mobile station simultaneously receives information signals from multiple base stations, comprising the steps of transmitting from the base station to the mobile station a power control command having a given value; receiving the power control command and the mobile station, determining from the receive power control command a parameter representative of the quality with which the power control

Art Unit: 2686

command is received at the mobile station, and controlling the power which mobile station transmits signals based on the determining step.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Response to Arguments

3. In response to the applicants "*request reconsideration of the restriction requirement under 37 C.F.R. 1. 143. Applicants submit that the inventions, as claimed, are not distinct. As stated in the Office Action, Inventions I and 11 are related as combination and subcombination. In order to establish that combination and subcombination inventions are distinct, two-way distinctness must be demonstrated. MPEP 806.05(c). Thus, inventions are distinct if it can be shown that a combination as claimed: does not require the particulars of the subcombination as claimed for patentability (to show novelty and unobviousness), and the subcombination can be shown to have utility by itself or in other and different relations. Applicants submit the above factors are not met by the Office Action, and that the inventions are not distinct*", the examiner agrees with the applicant. Therefore, Applicant's arguments with respect to claims 1-39, have been considered but are moot in view of the new ground of rejection.
